

GOALS OF A SMART CITY

Smart Cities are living organisms that grow, develop and evolve as their residents do.

- ▶ **Generate spaces where different knowledge, skills and abilities interact, circulate and exchange**

- ▶ **Include in an integrated manner: people, industry, academy and government in the planning, development, implementation and evaluation of solutions for cities**

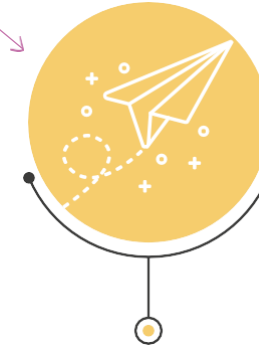

- ▶ **Strengthen the implementation of public-private collaboration mechanisms in the development of ICT projects**

- ▶ **Meet the Sustainable Development Goals**

CHALLENGES AND OPPORTUNITIES

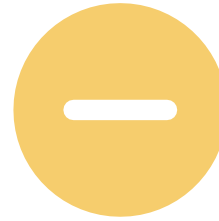

- ▶ **There are too many entities and procedures, a regulatory minimalism is required.**
- ▶ **To connect the solutions and problems of each city**
- ▶ **Policies with a short term scope**
- ▶ **Low coverage in remote areas**

- ▶ **Start from the scratch: Small cities, bigger opportunities**
- ▶ **More interaction with the academy and people to adapt the solutions to each city**
- ▶ **Increase the quality of live for the citizens**

POLICY RECOMMENDATION

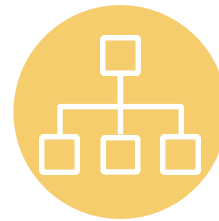

Strengthen the digital ecosystem:

Reducing barriers to entry, excessive regulation and tax burdens

Guaranteeing the appropriate deployment of telecommunications infrastructure

Simplifying and streamline procedures, to connect the entire population

Ensuring security and privacy of citizen's data
