Operation Energy Innovation:
A Stronger, Smarter Fighting Force

Thursday, March 31, 2011
8:45 AM - 10:30 AM

Rayburn House Office Building-Room 2226
45 Independence Avenue SW
Washington, DC 20219

Overview:
There are many obvious sources of clean energy innovation. But lately the clean energy community has begun paying attention to one not-so-obvious source: the Department of Defense. With a massive energy footprint and a mission-driven need to reduce fossil energy consumption, DOD can play a prime role accelerating cleantech development and is already seeking to become a test bed for innovative technologies.

8:45 AM	Welcome and Introduction of Representative J. Randy Forbes by Dean Garfield, President, Information Technology Industry Council
8:50 AM	Remarks by Representative J. Randy Forbes, (R-VA)
8:55 AM	Introduction of Senator Mark Udall by Dean Garfield
